

First task

```
sarah@sarah-VirtualBox:~$ cat name.py
sarah@sarah-VirtualBox:~$ echo " # coding: utf-8
print ('I'm software robotics engineer, and now learning ROS.') " > name.py
sarah@sarah-VirtualBox:~$ sudo chmod u+x name.py
[sudo] password for sarah:
sarah@sarah-VirtualBox:~$ python3 name.py
I'm software robotics engineer, and now learning ROS.
sarah@sarah-VirtualBox:~$
```

Second task

```
sarah@sarah-VirtualBox:~$ echo " #include <iostream>
using namespace std;
int main(){
cout <<"I'm software robotics engineer, and now learning ROS.\"<<endl;
return 0;
} " > name.cpp
sarah@sarah-VirtualBox:~$ g++ -g name.cpp -o name
sarah@sarah-VirtualBox:~$ ./name
I'm software robotics engineer, and now learning ROS.
sarah@sarah-VirtualBox:~$
```
